CORRUGATED INSERTS

Corrugated is an excellent shock absorbing and puncture resistant material. In many cases a corrugated design can effectively secure a product during shipment. Corrugated die cut inserts are specifically designed to hold the product securely in place.

FOAM INSERTS

In some packaging applications inner using Polyurethane foam or Polyethylene foam is needed. Both types can be die cut to "stamp out" a part that produces an exact fit to your particular application. Anti-static foam can be supplied to protect sensitive electronic components. It is available in both foam types. Foam can be used in combination with corrugated to produce a highly protective inserts.

HEAVY DUTY BOXES

We offer boxes that are capable of supporting the heaviest and largest products like engines, machinery, medical equipment and appliances. For these heavy loads double wall and triple wall corrugated board is used.

GOVERNMENT GRADE BOARD (V&W Board)

We are capable of manufacturing corrugated boxes used by the military and government contractors to enable safe transportation and storage of sensitive equipment that is subjected to high humidity, outdoor/long term storage, and export shipment. These packages are manufactured with Government grade cardboard that is weather resistant.

CRATES & CONTAINERS

We can design and build a custom crate to meet your domestic and international shipping needs. Our crates use a combination of wood and corrugated to create a unique container that compares to all wooden container but at a lesser weight.

CUSTOM PACKAGE DESIGN

Our engineers will provide on-site consultation and evaluation for your particular packaging application.

The design process is greatly enhanced by the use of CAD software specifically for the corrugated industry.

We provide our customers with a sample before full production so any adjustments can be made, or in cases when the package must be submitted to other locations for final approval.

Technical drawings of the design can be provided if documentation is required.

CUSTOM BOXES

Custom boxes are manufactured in numerous styles, to the specific dimensions your product requires. Whether you are looking for one custom box or thousands, singlewall or doublewall—we are your solution.

OUR PHILOSOPHY

St. Pete Paper is committed in providing our customers with the best solutions to their packaging problems.

We do this by:

- Educating our customers as to what materials and manufacturing methods are available for their specific application and budget.
- Provide quality materials and workmanship.
- Provide on time delivery
- Provide exceptional customer service through the order process, and follow-up after the order is delivered

Our goal is to build lasting relationships by giving our customers the products and service they deserve.
